SUMMARY

Frontend Engineer with **4+ years** shipping React/Next.js products across ecommerce, property technology, edtech and social gaming. Delivered experiences for **70K+ weekly users**, reduced property-listing load time from **~10s to under 1s**, and contributed to **65% organic traffic growth**. Focused on frontend architecture, performance, usability and product outcomes.

EXPERIENCE

Founding Engineer – Frontend | Zosma AI — Sep 2025 – Present

- **Frontend architecture:** Led frontend architecture across multiple product directions during rapid pivots, establishing reusable Next.js patterns, observability (Grafana Faro, Umami), and monorepo structure.
- **Financial interfaces:** Building financial interfaces and co-pilot experiences for finance institutions to help teams manage and understand their financial data.
- **Foodstories:** Owned Next.js ecommerce storefronts serving 4K+ DAU / 70K+ weekly users; shipped checkout, gifting, B2B bulk orders and personalized hamper flows for Foodstories.
- **Performance & SEO:** Used SSR, ISR and SSG to reach Lighthouse 98 and sub-1s First Contentful Paint; added dynamic sitemaps, canonicals and JSON-LD, contributing to 65% organic growth in 3 months.
- **Prakhhyat Group:** Designed & built a full-stack Next.js litigation-management app with Better Auth, server actions and PostgreSQL: Kanban, role-based access, audit history, analytics and PDF generation. Added offline-first hearing packs, queued edits with reconnect sync, conflict safeguards and deadline notifications; deployed on-premises with PM2 for Prakhhyat Group.
- **Zosma Cowork:** Built Next.js interfaces for an open-source AI coworker, separating product UI from the Hono agent runtime and contributing to monorepo/application architecture migration (GitHub).
- **Additional products:** Built a Next.js/Fastify vendor CRM with SAP-webhook shipment tracking, a React Native D2C app using gRPC, and a Tauri + Next.js desktop prototype integrating with Tally to generate ledger summaries, P&L statements and management reports.

Software Development Engineer I | Mavonic — Oct 2024 – Sep 2025

- **PropertyGuru:** Moved Strapi-backed listings from per-request SSR to ISR on PropertyGuru, a platform with 10K+ daily visitors, cutting page load from ~10s to under 1s while keeping listings refreshable.
- **Realtor Leads:** Built a Next.js project with a Strapi backend for role-based lead assignment and follow-up workflows.
- **Draftus:** Shipped a mobile-first Next.js edtech MVP using Supabase/server actions, query optimizations, and TanStack Query and Zustand for state management at Draftus.

Frontend Engineer | IOTric — Jun 2022 – Oct 2024

- **Enoobs:** Built the Next.js 14 frontend for a social gaming platform from scratch; shipped UX iterations, integrated Mixpanel and mentored an intern at Enoobs.
- **Integrations:** Built real-time chat integrations (Mirrorfly/Pusher) and interfaces for the ThirdEye Gen platform for AR/MR smart glasses; also developed usage & billing modules with Stripe integration, MyIDFi workflows, lender search and realtor-profile integrations.
- **qie-chatbot:** Published qie-chatbot, a React npm package for embedded conversational UI.

OPEN SOURCE & SIDE PROJECTS

- **Tabot:** Open-source local-first Chrome extension/dashboard for browser session timelines, domain history, navigation paths and recurring visits. Built an MCP relay so ChatGPT can query extension-local activity without a cloud intermediary; GitHub and live demo.
- **Qagent:** Change-aware Next.js regression-testing tool that maps affected routes, probes browser behavior and uses AI to generate/refine Playwright tests (npm package).
- **OTP Service:** TypeScript service for concurrency correctness, multi-window rate limiting and horizontal scalability (GitHub).
