SUMMARY

Frontend Engineer with **4+ years** shipping React/Next.js products across ecommerce, property technology, edtech and social gaming. Delivered experiences for **70K+ weekly users**, reduced property-listing load time from **~10s to under 1s**, and contributed to **65% organic traffic growth**. Focused on frontend architecture, performance, technical SEO and product execution.

EXPERIENCE

Founding Engineer - Frontend | Zosma AI **Sep 2025 - Present**

- **Foodstories:** Built Next.js ecommerce storefronts for 4K+ DAU / 70K+ weekly users, shipping checkout, gifting, B2B bulk orders and personalized hamper flows.
- **Performance & SEO:** Applied SSR, ISR and SSG to reach Lighthouse 98 and sub-1s First Contentful Paint; added dynamic sitemaps, canonicals and JSON-LD, contributing to 65% organic growth in 3 months.
- **Prakhhyat Group:** Built a full-stack Next.js litigation-management web app using Better Auth, server actions and PostgreSQL, with Kanban workflows, role-based access, audit history, analytics and PDF generation. Added offline-first hearing packs, queued edits with reconnect sync, conflict safeguards and deadline notifications; deployed on-premises with PM2.
- **Zosma Cowork:** Built Next.js interfaces for an open-source AI coworker, separating the product experience from the Hono agent runtime and contributing to monorepo/application architecture migration.
- **Zosma AI Web:** Owned technical SEO, Core Web Vitals and frontend observability; improved LCP by removing unnecessary client bundles and reducing above-the-fold JavaScript, and integrated Grafana Faro.
- **Additional products:** Built a Next.js/Fastify vendor CRM with SAP-webhook shipment tracking and a React Native D2C app integrated over gRPC.

Software Development Engineer I | Mavonic **Oct 2024 - Sep 2025**

- **PropertyGuru:** Improved a property platform serving 10K+ daily visitors by moving Strapi-backed listings from per-request SSR to ISR, cutting page load time from ~10s to under 1s while keeping published listings refreshable.
- **Realtor Leads:** Built role-based lead assignment and follow-up workflows; also shipped a mobile-first Next.js edtech MVP for **Draftus** using Supabase/server actions, query optimizations and internal FaceNet/FastAPI vision tools.

Frontend Engineer | IOTric **Jun 2022 - Oct 2024**

- **Enoobs:** Built the Next.js 14 frontend for a social gaming platform from scratch; shipped UX iterations, integrated Mixpanel and mentored an intern.
- **Integrations:** Built real-time chat integrations (Mirrorfly/Pusher), Web3 interfaces and AR/VR/Web3 admin analytics; developed **MyIDFi** admin workflows, lender search and realtor-profile integrations. Published qie-chatbot, a React npm package for embedded conversational UI. npm package

OPEN SOURCE & SIDE PROJECTS

- **Tabot:** Built an open-source, local-first Chrome extension and dashboard that organizes browser activity into session timelines, domain history, navigation paths and recurring-visit patterns. Built an **MCP relay** that lets ChatGPT query activity in the extension's local storage directly, with no cloud intermediary. Live demo
- **Qagent:** Change-aware Next.js regression-testing tool that maps affected routes, probes browser behavior and uses AI to generate/refine Playwright tests.
- **OTP Service:** TypeScript service focused on concurrency correctness, multi-window rate limiting and horizontal scalability.
